Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 60 is rejected under 35 USC Sec. 102(a) as unpatentable over WO99/04878¹ to Nedez. Nedez describes reduces the amount of organophosphorus compounds (please see col 5 line 50 through col 6 line 7) in an organic liquid process waste stream by adding a composition or mixture comprising titanium dioxide (col 5 line 2 and throughout), an alkaline earth metal (col 5 line 32), and² iron (col 5 line 34) thereto. Upon disclosure of "alkaline earth metal," the skilled artisan would have "at once envisaged" disclosure of calcium as well as Sr, Ba, and Ra.

Claims 50 – 59, 72-85 are allowed.

Claims 61 – 71 are objected to, but would be allowed if re-written in independent form.

USP 4267058 to Kyri describes « iron (II) sulphate heptahydrate » as a byproduct of titanium dioxide manufacture, but does not describe use of titanium dioxide itself to dephosphatize a liquid waste effluent stream.

USP 5961968 to Moore is exemplary of the cited Moore patents describing use of ferric sulphate heptahydrate in combination with a calcium compound (see for example Table

¹ This reference – an equivalent of USP 6656363 – intervenes the filing of the provisional application and the pending national stage of the international application.

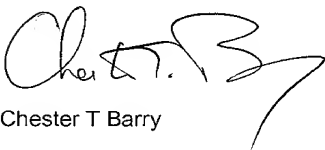

² See disclosure of "at least one of the elements selected from [various elements]" (col 5 line 30). The skilled artisan would have understood this to mean "the elements selected from [various elements], *and mixtures thereof*." See also description of the presence of "compounds of these elements" (emphasis added) at col 5 line 36.
